Industrial collaboration agreement between Tecnoideal – THF Division (part of Medica Group) and CEBB H.F. Technology S.r.l.

Tecnoideal – THF Division, part of the Medica Group, and CEBB H.F. Technology S.r.l. announce the signing of an industrial collaboration agreement aimed at developing technological, production and commercial synergies in the field of high-frequency (HF) welding machines.

This collaboration has been established with the objective of enhancing and integrating the distinctive expertise of both companies. CEBB H.F. Technology S.r.l., active in the development and manufacturing of systems based on high-frequency technologies, and Tecnoideal – THF Division, with its long-standing industrial experience and a wide installed base worldwide, will work together to develop increasingly efficient and competitive solutions for the market.

With decades of presence in the industry, THF has built a significant installed base of machines that continue to operate reliably even after more than thirty years. This consolidated experience now forms the foundation for a renewed industrial structure aimed at strengthening responsiveness to market needs.

Through this collaboration, the two companies intend to combine technical expertise, production capabilities and commercial presence, with the goal of improving lead times, overall project quality and competitiveness in HF applications for tarpaulins, covers, technical fabrics, the biomedical sector, related processes and specialized applications.

This agreement represents a further step in the growth and innovation path of both organizations, which share a common vision focused on developing reliable, efficient solutions aligned with the needs of their reference markets, both nationally and internationally.
